26. The Cutest Of The Cute

## The Cute Ones

### OUR BUDDIES FOREVER

#### Episode 1

---

**Opening Titles / Teaser:** From the vast savanna's to the tranquil seas, in lush rainforests and across the icy shores – welcome to a world where cute and cuddly reigns supreme. Here cuteness comes in all shapes and sizes. They're fluffy, curious and even slimy, but have one thing in common – they're all RIDICULOUSLY cute!

Introduce our “buddies forever”: Cats, dogs, horses, fish and reptiles – whatever the species we LOVE our pets and for many of us our furry, feathery, scaly friends have also become true and valued members of our families!

Various cute, domesticated pets and their owners

---

#### Break (1) One

---

**Little Buddies:** Cute puppies, cuddly little kittens or adorable bunnies – nothing makes a person ooh and ahh and get that warm, gooey feeling more than playing or watching baby animals, which is why many of us choose to get our pets when they're still young.

---

#### Break (2) Two

---

**Special Relationship between Pets and Kids:** If baby animals aren't cute enough – the special bond between kids and their pets is even cuter, for many of us our pets are also our first best friends.

Various – kids and their pet stories. Having a pet in the home brings love, laughter and joy with lots of cuddle time, playing in the yard, walks in the park and even funny dress up times – I mean what's cuter than a pit-bull in a dress, a poodle in a tiara or a bearded lizard in a tutu? Super fun times while also teaching kids confidence and responsibility.

---

#### Break (3) Three

---

**Dogs vs Cats:** Why do they call dogs man's best friends and not cats? Dogs and cats are known to have been our loyal companions for over 10,000 years, but why do some of us prefer one species over another?

Dog owners will tell you dogs are loyal, affectionate, friendly and playful. They show unconditional love and are good guardians and playmates for children. But are cats JUST cute to look at? No way! Cats can be independent and a little wild as they ambush us when we least expect it, but they also give us lots of love and affection. In fact some cats even enjoy taking walks, driving on motorcycles and surfing with their owners! [Unusual or Surfing cat footage?] AND reptile lovers will tell you they get just as much love and affection from their scaly friends too!

One fact remains all animals can be adorable, sweet, funny and SUPER CUTE to the people who love them!!

---

---

#### Break (4) Four

---

**Pets Give Back:** We know we love our pets and many of us spoil them rotten – giving them the best foods, comfy beds, fancy outfits and even cupcakes on their birthday's, in return pets are cute, cuddly and give us unconditional love. But it's not all about licks, cuddles and chirps - many of our pets also serve to protect, help and guide us and some even work with us.

Farm cats control rodent problems, horses help herd livestock and dogs actually work alongside their owners as police dogs, military dogs and service dogs that help people with disabilities – seeing eye dogs are trained to lead their owners safely around obstacles and for other dogs their main job is just to make people happy with visits to nursing homes and hospitals.

Close: No matter the species you prefer we all know animals bring us boundless amounts of love and friendship and are our most special and cherished BUDDIES FOREVER.
