GENRE: History – WWII

Episode 1 - Angel's Dawn and Eugenics

Episode 2 - Auschwitz, "Unveiling the Angel of Death"

Episode 3 - 34 Years in a Rat's Life

The passion for eugenics. The selection of the race. The Auschwitz laboratory. The unspeakable and heinous crimes. The obsession with twins and children. The escape. The hunt. The mysterious death. Don't be fooled by the courtesy and the smile because Evil lurks everywhere. Josef Mengele is known as the Angel of Death; he committed unspeakable and heinous crimes. Josef Mengele was a doctor, but the Hippocratic oath meant nothing to him. Mengele's favourite patients were children, mostly twins. For Mengele, they were not human beings but only guinea pigs to be used for his own experiments. Mengele was not the only bloodthirsty madman; he was the cog in the wheel of an insane ideology that had sprung up at least a century earlier in the western world and had become radicalised in Germany, contributing significantly to the cult of the Aryan race and the birth of Nazism. We are talking about eugenics, i.e., a set of theories and practical acts aimed at improving race, mainly through the suppression and sterilisation of the weaker members of society, such as the mentally ill, the crippled, and the socially marginalised. At the end of World War II, Mengele took refuge in South America. Protected by complicity and ideological affinity, he was never caught and died a free man in 1979, never regretting his crimes.

80th Anniversary of the Liberation of the Camp

An exceptional documentary film that chronicles the liberation of Auschwitz, commencing on the day of liberation and backtracking in time to narrate the tragedy of the Holocaust from four distinct perspectives. The prisoners, the Liberators, the Perpetrators, and the Local residents.

Perhaps the last significant occasion in which we will witness the direct participation of former prisoners and Holocaust survivors. More than 40 state delegations at the level of monarchs, presidents and prime ministers are expected to participate. An event that will be observed by thousands of journalists from across the globe. It is worth noting that the 70th Anniversary of the Liberation of Auschwitz, according to the Edelman PR company / New York, was watched live by approximately 700 million people.

"Auschwitz, Countdown to Liberation" is a film that takes the audience on a profoundly moving journey through the harrowing moments of the camp's liberation and the crucial events leading up to it.

GENRE: History

- Episode 2 – The Fight
- Episode 3 - The Victory

Ronald Reagan and Pope John Paul II were men of the same time. Both were terrified of nuclear war, both hated communism and the Soviet Union, both had been shot but survived, and both had forgiven their attackers. They had also both been top athletes and, interestingly, they had both been actors before becoming major players on a world stage. Reagan and Wojtyla were the undisputed protagonists of the 1980s, culminating in their roles with the collapse and crumbling of the Soviet empire and the end of the Cold War. They appeared on the world stage as two distinct characters within a short distance of each other. In some respects - first and foremost, their background and cultural depth - they are as different as can be. In others, however, they are strikingly similar: great communicators, former actors, sportsmen, staunch advocates of their ideas and convictions, and black beasts of the global left. Their political and spiritual convictions have led them to crucial roles. Reagan was appointed President of the United States, and John Paul II was set, Pope. They were soon united by a dramatic experience. Within a month and a half of each other, in 1981, they were victims of assassination attempts that only by a miracle were not fatal.

GENRE: History

Episode 1 – Where it All Began: Budapest

Episode 2 – The Science

Episode 3 - The Geniuses After the War

The race for the atomic bomb has been told many times. The story behind it has largely gone unnoticed: it is the story of those brilliant scientists without whom this bomb would never have come into being. The American J. Robert Oppenheimer is the most prominent of them, he is well known. But four other scientists have so far stood in his shadow. They were from Hungary, later fled fascism and went to the United States. There they dedicated their lives to the fight for freedom and entered into a Faustian pact: they wanted to prevent Hitler's victory at all costs, for this they fought with the means of mathematics and physics - and created the most devastating weapon of all time. Science in the service of war - in the midst of a moral dilemma that is more relevant today than ever.

Episode 8 - Reinhard Heydrich

Of these men we know only the public faces, the sides they presented to the world. What do we really know about their private lives?

A look behind the closed doors of the Third Reich. Written by Guy Walters, historian. "We like to think that we know a lot about those who led the Nazi regime. As someone who has broadcast and written extensively about the Third Reich for over two decades, I assume that I know the personalities of Hitler, Himmler and Goebbels etc. But we really only know the public faces of these men – the sides that they presented to the world." That needs to be corrected !!

We want to examine the secret lives of Nazi leaders, and to get to know them as fully-rounded human beings, and not just to know them by their actions, or indeed to regard them as two-dimensional monsters. To do that, I need to look deeply into their most private lives. I want to find out what these men were like as husbands, lovers parents, and patients. I want to see their frailties and fears, and their clandestine vices – be it alcoholism, sexual infidelity, drug addiction, or gluttony. By looking at newly-released archival material such as letters, photos, home movies, and even prescriptions, and combined with interviews with surviving children and relatives, the Secret Lives of the Nazis will finally lift the lid on who these terrible men really were.

Episode 4 – ISTANBUL: Secret Plots and Conspiracies

During World War II, while the most important cities in Europe were being razed to smoking rubble, there were places that still glittered during the darkest nights. Some few countries would declare their neutrality in this conflict, and in cities like Lisbon, Geneva, Stockholm and Istanbul, businesses were open, people went to work, and life went on as usual. Soon, those lucky and resourceful enough to escape the war zone would find their way into these oases of peace. The wealthier would enjoy glamorous lifestyles spent at the elegant hotels, fashion shops, luxurious restaurants or even lively clubs and casinos where Jazz orchestras would set rhythm from dusk till dawn. It was here that Ian Fleming was inspired to write James Bond. It was here that nests of spies thrived, and regimes were made and broken by covert agents in the dangerous and frantic battle for information. Welcome to the Spylands.

We explore the world's most fantastic conspiracy theories from an objective point of view!

Every story has two sides, and the truth lies in the middle.

Since the end of the Cold War and the collapse of the Soviet Union in 1991, the public has become increasingly suspicious of the real intentions of various governments. It has come to believe governments hide the absolute truth and conspire against their people. Since the terrorist attack on the World Trade Center on 11 September 2001 we have witnessed the continued rise of conspiracy theories. Because they offer alternative explanations to actual events, conspiracy theories are often full of contradictions. The advent of the Internet has proved to be fertile ground for developing conspiracy theories. Although there are hundreds of websites on conspiracy theories, not all of them offer credible information. Call it Conspiracies provides a thoughtful analysis of conspiracy theory, which, as we know from online audiences, is a hotly debated topic. We open the episode by laying out the narrative, with leading experts explaining the conspiracy and why it matters to viewers. Exploring the evidence, we examine the arguments for and against the theory, interviewing experts, journalists, and theorists. There will be time to debunk some of the more ridiculous notions that gather at the edges of each theory, which will only serve to make our main narrative more credible and compelling. At the end of each episode, we will leave it to the audience to form their own opinions to make their minds up about what they have just heard and seen

The natural world can be a very dangerous place, but some animals are lucky enough to enjoy a life with no fear as they have no predators. Each individual animal species has unique characteristics, but the one thing all living things have in common is the need for food. The food chain is the structure that determines the order in which creatures eat each other to survive. Being considered an apex predator means being at the top of the food chain. It means that an animal is not afraid of any higher life form.

Although we may not encounter many of these species in our urban environment, they are still out there. Some of these creatures rule their domain mercilessly and are the top animals in their respective ecosystems. The lion, the king cobra and the great white shark are just some of the most famous apex predators. This series will bring us 'face to face' with these ruthless 'Terminators'. We will experience, moment by moment, the lives of the world's deadliest predators. 8 episodes, one for each 'Terminator'. We will observe these lethal animals as they grow into adult predators, honing the instincts and skills they will need to become ferocious hunters. Viewers will be fascinated by how these animals track down and kill their prey.

A true crime documentary series that reveals new and previously unknown aspects of the alleged serial killer, ultimately raising the question: Was Jack Unterweger possibly innocent?

The story revolves around the unique manhunt for Jack Unterweger, an Austrian convicted murderer and alleged serial killer who was suspected of multiple prostitute murders in both Europe and the United States. Unterweger gained significant international attention because, after serving a 15-year prison sentence for the murder of 18-year-old Margret Schäfer in 1974, he was released on parole in May 1990 and achieved fame and recognition as a writer and a successful case of rehabilitation before falling under suspicion for the serial killings of prostitutes. His crimes and his apparent ability to lead a double life and manipulate others made him one of the most fascinating and disturbing personalities in criminal history.
